

Biostop

Biostop is formulated for administration to all species and commercial breeds of poultry to maintain and support them during periods of digestive upset. It can be particularly effective when difficulties are encountered during or after antibiotic therapy.

Composition: mixture of flavouring compounds, thymol, glycerin, sorbitol, propylene glycol

Indications: Biostop intended for all breeds and production groups of poultry in case of:

- persistent problems with wet bedding
- indigestion

Usage: 500 – 1000 ml / 1000 L of drinking water in a half of daily water consumed for 3-5 days

Package: 1L, 2L, 5L
